

Deleting OneNote for Windows Notebook from OneDrive

OneNote is a popular note-taking application that allows users to create and organize digital notebooks. OneNote notebooks can be stored on OneDrive, Microsoft's cloud storage service. However, there may be instances where you no longer need a specific OneNote notebook and want to delete it from your OneDrive. This article will provide step-by-step instructions on how to delete a OneNote for Windows notebook from OneDrive, specifically tailored for the Windows environment.

Examples:

1. Deleting OneNote Notebook from OneDrive using the OneNote App:

- Open the OneNote app on your Windows computer.
- Navigate to the notebook you want to delete.
- Right-click on the notebook and select "Delete" from the context menu.
- Confirm the deletion when prompted.

2. Deleting OneNote Notebook from OneDrive using the OneDrive website:

- Open a web browser and go to the OneDrive website (<https://onedrive.live.com>).
- Sign in with your Microsoft account if prompted.
- Locate the notebook you want to delete.
- Right-click on the notebook and select "Delete" from the context menu.
- Confirm the deletion when prompted.

3. Deleting OneNote Notebook from OneDrive using PowerShell:

- Open PowerShell with administrative privileges.
- Run the following command to connect to your OneDrive account:

```
Connect-OneDrive
```

- Run the following command to list all the notebooks in your OneDrive:

```
Get-OneDriveItem -Path "/Notebooks"
```

- Identify the notebook you want to delete and note down its ID.
- Run the following command to delete the notebook:

```
Remove-OneDriveItem -Path "/Notebooks/{notebookID}"
```
